

Ai Is Rewriting Digital Transformation at The Frontline

The Missing Layer in Digital Transformation for Frontline

While enterprises invested in ERP systems, dashboards, automation, and analytics, frontline teams still rely on:

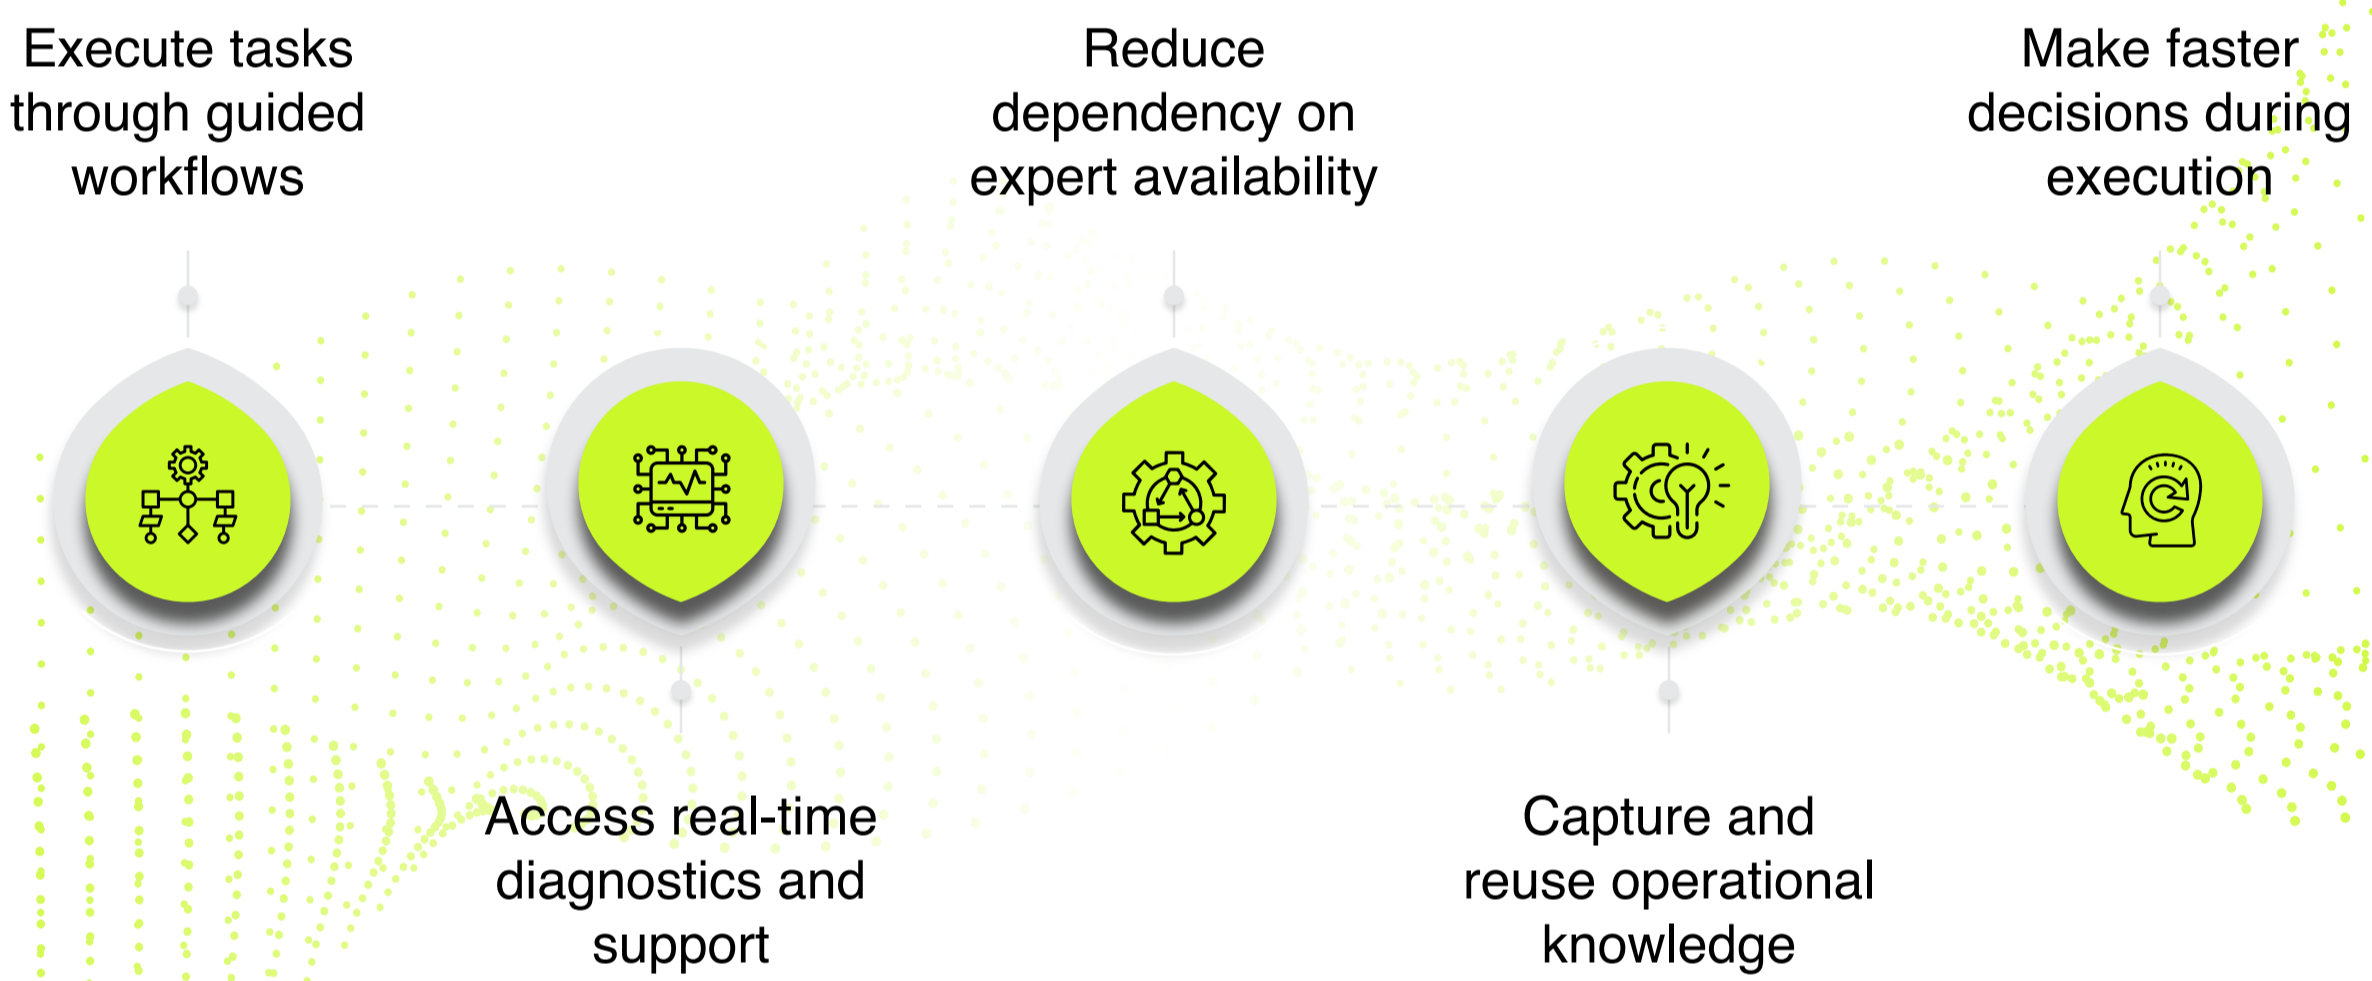

Result: No intelligent support at the moment of work.

AI is moving from Analysis to Execution.

The next phase of digital transformation is bringing intelligence directly into the moment of work.

AI is now helping frontline teams:

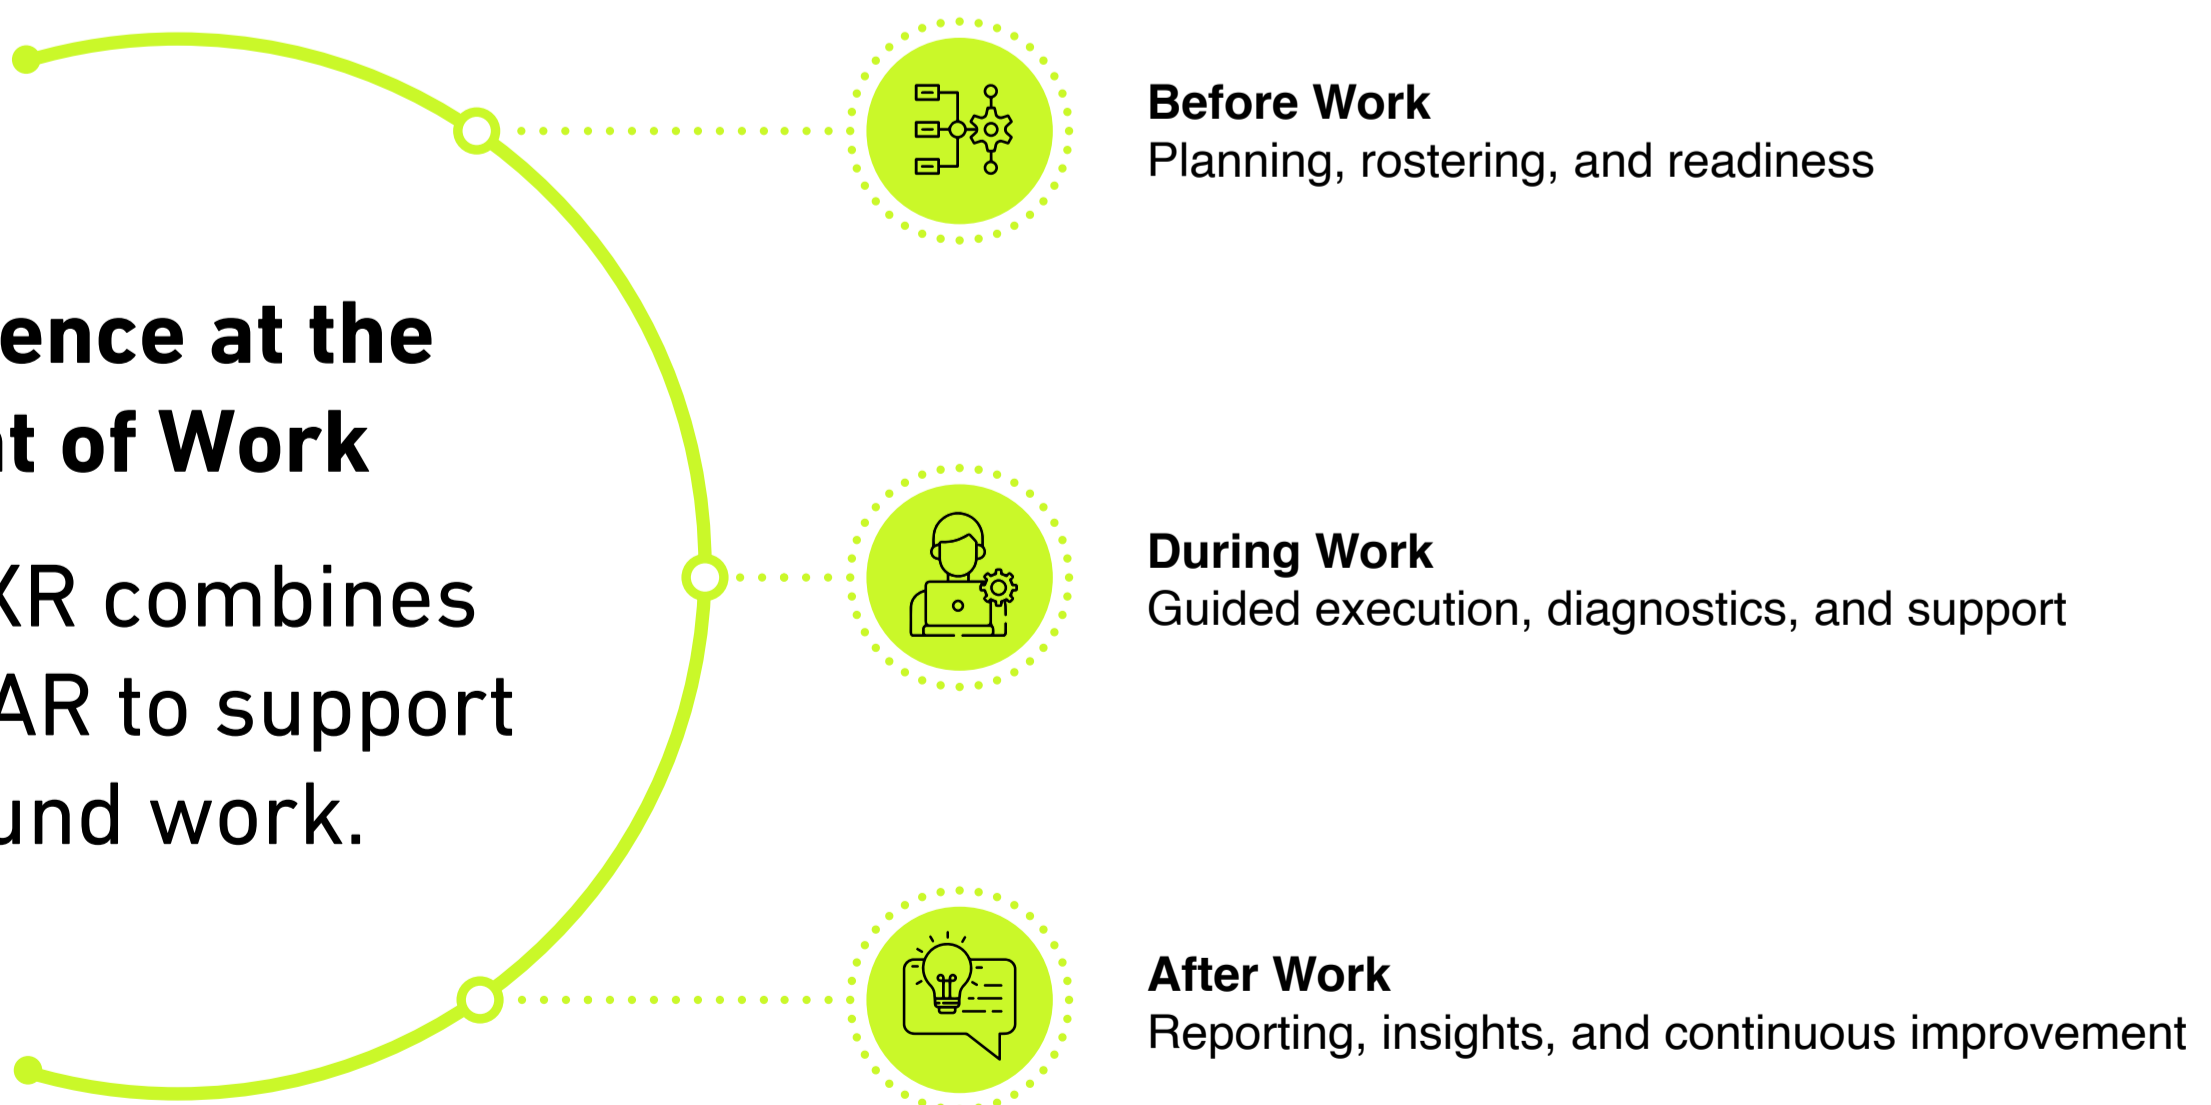

Why Intelligence at the Frontline Matters

<p>80% of the global workforce is deskless Source: World Economic Forum</p>	<p>Only 1 in 5 frontline workers feel they have the technology needed to be productive Source: Microsoft Work Trend Index</p>	<p>Technicians spend up to 30% of their time searching for information Source: World Economic Forum</p>
<p>Guided workflows can reduce task completion time by 30–50% Source: World Economic Forum</p>	<p>Industrial businesses lose up to \$50 billion annually due to unplanned downtime Source: Deloitte</p>	<p>80% of manufacturers say AI improves productivity and saves time Source: KPMG</p>

Intelligence at the Moment of Work

UnfoldXR combines AI and AR to support on-ground work.

Mission: 1 Million Productivity Leap by 2030
Empowering frontline teams with real-time intelligence
