

AI Evolution: From Dashboards to Execution

The next phase of AI is bringing intelligence directly into the moment of work.

THE EVOLUTION OF AI

Yesterday AI helped Businesses:

- Analyse data
- Build dashboards
- Forecast demand
- Optimise planning

Today AI is helping Frontline Teams:

- Execute tasks
- Make decisions
- Solve problems in real time
- Capture operational knowledge

AI SUPPORTING EXECUTION AT THE FRONTLINE

72%

of employees globally now use AI at work at least once a week.

Source: BCG AI at Work Survey 2025

50%

of AI users save **more than one hour every day** using Generative

Source: BCG

42%

use that saved time to get more work done, while **39%** spend it on higher-value work.

Where AI Creates the Greatest Impact

Industry	AI is helping with
Manufacturing	Predictive maintenance • Quality inspection
Automotive	Predictive maintenance • Production quality
Oil & Gas	Asset monitoring • Equipment diagnostics
Healthcare	Clinical diagnostics • Personalised treatment planning
Retail	Personalised shopping • Inventory optimisation
Insurance	Claims assessment • Fraud detection
Aviation	Predictive aircraft maintenance • Flight operations support
Marine	Vessel maintenance • Fleet monitoring

Intelligence at the Moment of Work by UnfoldXR

Our AI Virtual Assistant aka AVA supports frontline teams across every stage of execution

Before Work

- Context
- Planning
- Task readiness

During Work

- Guided workflows
- Smart Scan
- Decision support
- Remote collaboration

After Work

- Automated reporting
- Knowledge capture
- Performance insights

Deploy Anywhere

Mobile

Tablet

Smart Glasses

Wearables
